- Software Methodology
- Database Management
- Computer Network
- Web Technology

Projects

TinDog | *HTML CSS JavaScript*

June 2023

- Tindog is a website that helps dog owners find compatible matches for their pets. It is inspired by the popular dating app Tinder, but designed for dogs. I used HTML, CSS and Bootstrap to create this website.
- GitHub

Portfolio | *React Email.js SCSS JavaScript*

Jan 2024

- Developed a personal online portfolio using React and SCSS to showcase my skills and projects. Integrated EmailJS for seamless contact form functionality, enabling direct communication with potential employers.
- GitHub

BMI Calculator | *HTML CSS JavaScript*

March 2024

- Created a BMI Calculator that calculates the Body Mass Index based on user input of height and weight. The application provides instant feedback on the user's BMI category, helping users understand their health status.
- GitHub

News-App | *HTML Tailwind CSS, React, NewsAPI*

June 2024

- Developed a dynamic News App using React and the News API, allowing users to filter news based on their desired categories like Health, Entertainment, and Sports. The app delivers real-time, personalized news content, enhancing user engagement and experience
- GitHub

Technical Skills

Languages: C, C++, Python, HTML5/CSS, JavaScript

Developer Tools: VS Code, GitHub, ZOD, Email.js, Figma

Technologies/Frameworks: ReactJs, NextJs, Bootstrap5, Tailwind

Coding Achievements
